## Partner Profile

Ann is a safety management professional with 11 years experience ensuring the safe delivery of works in the rail and civil environments in Australia and International market.

Skilled at driving change in safety behaviour within project teams through a combination of safety governance, monitoring, training, mentoring, advice and assistance.

She clearly disseminates practical safety information to work towards a zero harm project outcome while striving for the delivery of value added safety solutions.

In addition, Ann has ensured the safe delivery of works on numerous flag ship projects through continual improvement and employee engagement in behavioural change within the industry. She has implemented and monitored Safety, Quality and Environmental management systems and strategies to ensure compliance with legislation and internal standards
