Employee Profile

Cassie is a data analyst specialist, Skytrust and construction and project management programmer. She has extensive experience in working on platforms including Skybuilt, MasterHUB, BusinessMate and Skytrust.

Major milestones in Cassie's career with Skytrust include completion of over 2,500 warranty and innovation tasks in the last two years. She has also completed a number of major projects within the Skytrust Platform including Skylog, Subcontractor Profiles, My Profile System, and JSA duplication. Cassie is heralded as the chief programmer of Skybuilt - a construction project management platform with sophisticated commercial process integration workflows.

Cassie has a professional approach to work, exemplary technical expertise and a vivacious positive personality.
